DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, 20-46, drawn to display apparatus, classified in class 349, subclass 158.
 - II. Claim 16-19, drawn to method of manufacturing a display apparatus, classified in class 349, subclass 187.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case liquid crystal apparatus can be made by polishing the inner surface of the substrate as opposed to the outer surface and also by injecting liquid crystal as opposed to dropping liquid crystal.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

(1) the specifics of the device comprising a display apparatus comprising polarizing plates on both sides of the display device comprising a first embodiment corresponding to Figure 2;

(2) the specifics of the device comprising a display apparatus comprising a polarizing plate on one side and a reinforcement plate on another side comprising a second embodiment corresponding to Figure 3;

(3) the specifics of the device comprising a display apparatus comprising a touch panel and polarizing plates on both sides of the device comprising a third embodiment corresponding to Figure 9;

(4) the specifics of the device comprising a display apparatus comprising a touch panel and a reinforcement plate on one side comprising a fourth embodiment corresponding to Figure 10;

(5) the specifics of the device comprising a display apparatus comprising a backlight unit comprising a fifth embodiment corresponding to Figure 15;

(6) the specifics of the device comprising a display apparatus wherein the sealing body is a glass substrate comprising a sixth embodiment corresponding to Figure 17;

(7) the specifics of the device comprising a display apparatus wherein the sealing body is a multilayer film structure comprising a seventh embodiment corresponding to Figure 18;

(8) the specifics of the device comprising a display apparatus wherein the device is a front surface emission type display comprising an eighth embodiment corresponding to Figure 19.

Art Unit: 2871

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2871

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
